ADMINISTRATIVE-INTERNAL USE ONLY

Program IMGRPT
U-1100/80

Date 3 December 1981

SUMMARY

The IMAGE EVALUATION REPORT DATA SET program (IMG-EVAL-RPT) will provide appropriate data on tape to the KGSSE. Each IMG-EVAL-RPT will query the Installation Data File (IDF) records and retrieve photo references.

This program should be started once per day (preferably sometime between 1800 and 0600 since the previous days records will be retrieved). It will be started from the console by the operator.

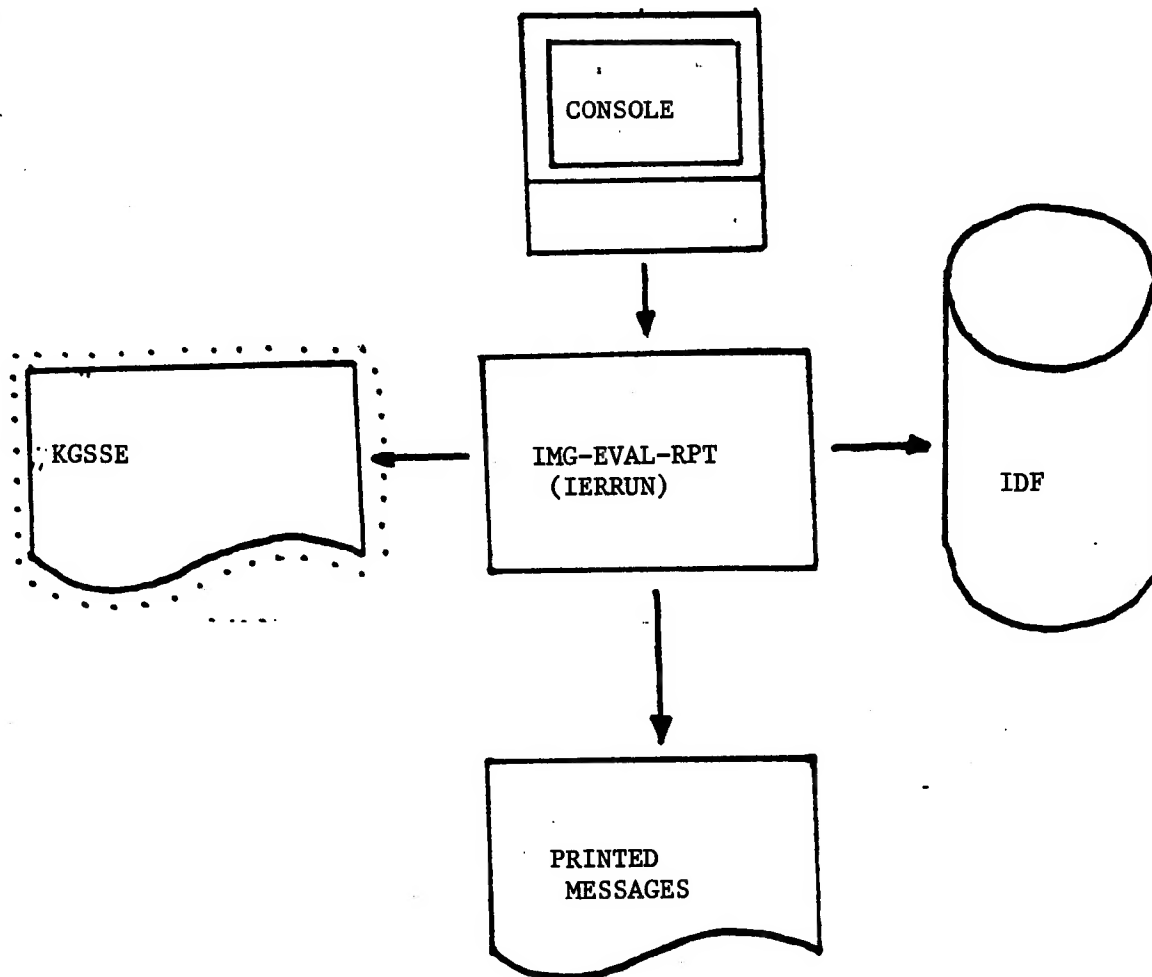

If IMG-EVAL-RPT program runs successfully it will generate a cable which is sent to DATEX automatically. It will also generate a page of Summary Statistics on the high speed printer. This list should be returned to the user. In the event of failure to generate a report, generation shall commence from the end point of the previous report (with no duplication of data). An error message will be printed on the high speed printer. This should be returned to the user.

Date 3 December 1981

PROGRAM LOADING

Type of Program: BATCH from console

Base Address: N/A

ECRT:

General Equation - Computer Run Time is Variable

Sample Estimate - N/A

FINAL CHECK SUMMARY

1. Runstream started daily from console
ST IMG-RPT
or ST XSS*P\$RUN.IMGRPT/XQT
2. Input Julian date from console in the form YYDDD.
3. Output listings returned to user.
